

I am writing about Sinclair Broadcasting's obviously partisan political programming with their plan to mandate that all their stations air a blatant anti-Kerry program before the Election.

This seems to me to be a violation of the privileged use of public airwaves. And it is even more scary that, because of media consolidation, they have so many stations that they reach 24% of the households in the U.S.

Our democracy is fragile, and this action by Sinclair Broadcasting shows me how important it is that FCC licensing procedures include more real input and discussion by all citizens. Thank you.
